Product Information

Product Family: Fumed Metal Oxides

Trade Name: SpectraAl™ 81 Fumed Alumina

Description: SpectraAl™ fumed alumina is a unique synthetic aluminum oxide nanoparticle. SpectraAl fumed alumina's extremely small particle diameter, high surface area, crystalline composition, high-purity and positive surface charge enables it to impart unique performance characteristics in a spectrum of end uses. SpectraAl fumed alumina is a light, fluffy powder that is white in appearance and is used in many applications and a variety of industries.
